Dear Sir:

Please replace Fig. 2 in the above-identified patent application with the substitute sheet provided herein. The substitute sheet for Fig. 2 corrects discrepancies between labels referred to in the Detailed Description and those in Fig. 2. Additionally, the substitute sheet for Fig. 2 completes some labels that were incomplete (e.g., incomplete labels "29?" and "33?") but which are correctly referenced in the Detailed Description. Further, in the specification, starting at page 24, line 16 and continuing through page 26, line 24, a card reader having a slot 220 is described in describing Fig. 2. Accordingly, such a card reader with a slot has been incorporated into the substitute sheet for Fig. 2. However, the label 220 is also used in the detailed description and Fig. 2 for labeling an activate button. Thus, to

distinguish the slot 220 from the button 220, the labeling on the slot has been changed to 221 on the substitute sheet. Note that in a separate paper requesting a preliminary amendment to the application, it is requested that the labeling of the slot in the detailed description text be changed to 221, to conform to this substitute sheet.

Respectfully submitted,

SHERIDAN ROSS P.C.
